The Skin Study Center

A unique translational core and center for human subjects research, located within University Hospitals Case Medical Center and Case Western Reserve University School of Medicine.

The Skin Study Center proudly collaborates with industry and academic partners to provide services and support investigators examining the skin, skin products, and skin diseases:

- Allergy Immune Response
- Antioxidants
- Hair Regrowth Agents
- Probiotics
- Sunscreens
- Other interventions aimed at protecting or improving the condition of human skin, hair, and nails

Goals:

- To facilitate human subject-based research in skin and skin diseases through translational research
- To serve as a tissue acquisition core providing skin biopsies, blood, and other tissue samples to investigators

Skin Study Center Staff (from left to right): Erich Zirzow, BS; A’ja Patterson; Mary Consolo, BS; Amanda Suggs, MD; Elma D. Baron, MD; Jennie Pexa, RN; Jacqueline Selph, MD; Minh Lam, PhD.

...Joining forces to drive research success.
The Skin Study Center has a wide spectrum of capabilities to facilitate and conduct clinical/translational research

Protocol and Research Study Collaborations with Industry Partners
Assistance with research design and regulatory compliance in accordance with IRB and Federal requirements

Blood Draws
Tissue Samples
- Punch Biopsies (3-8mm)
- Keratome Biopsies
- Tapestripping (0.2-0.6mm)
- Suction Blisters (1cm-2.5cm)
- Stratum Corneum Stripping

Saliva Samples
Minimal Erythemal Dose (MED) Determination
Photo-testing and Phototherapy
- UV irradiation using Simulated Solar Radiation (SSR)
- 308nm UVB excimer laser
- 595nm pulsed dye laser
- 675nm red light laser
- Intense Pulsed Light (broadband)
- 810nm diode laser (hair removal)
- Erythema/Pigmentation Assessment using colorimetry
- Chromametry

Product Application
Skin Sensitivity Tests
- Allergen sensitization/elicitation (patch testing)

Ultrasound

Clinical Assessments
Utilization of skin scoring systems (Ex: PASI, SCORAD, SCINEXA)

Clinical Photography
TEWL (Transepidermal Waterloss Measurement)

Contact Hypersensitivity Tests
- SADBE (Squaric Acid Dibutyl Ester)
- DNCB (dinitrochlorobenzene)
- DPCP (diphenylcyclopropenone)

...Joining forces to drive research success.
The center facilitates the iterative interaction (left) between basic science research and clinical research, depending on the design of the clinical study. This enables rapid translation of knowledge into useful practical interventions beneficial to skin health.

Leaders in Clinical and Translational Research University Hospitals Case Medical Center Department of Dermatology has a prominent National Institute of Health Skin Disease Research Center (SDRC) translational funded core. It is a Center for human subject research. This core brings the unique advantage of linking basic science investigation with clinical research, thereby allowing an efficient translation of knowledge gained to benefit patients in the long term.

The Skin Study Center upholds the highest standards in clinical research and oversight from University Hospitals Center for Clinical Research and Technology, and support from the Clinical and Translational Science Collaborative at Case Western Reserve University School of Medicine.
The Skin Study Center

STAFF

Minh Lam, PhD
Assistant Professor
Case Western Reserve
University School of Medicine
Director of Imaging
SDRC

Erich Zirzow, BS
Clinical Research Specialist

Jennie Pexa, RN
Clinical Research Nurse

Jacqueline Selph, MD
Cutaneous Oncology Fellow

Amanda Suggs, MD
Skin Study Center Fellow

Mary Consolo, BS
SDRC Research Specialist

A'ja Patterson
Clinical Research Coordinator
